

Password Reset Manual

1. Introduction

This guide helps general users reset their passwords across common systems. Keeping your password secure protects your personal information and accounts.

2. Resetting Password on Windows

1. Press **Ctrl + Alt + Delete**.
2. Select **Change a password**.
3. Enter your current password.
4. Type your new password twice.
5. Press **Enter** to confirm.

3. Resetting Password for Email Accounts

Gmail

1. Go to [Google Account Recovery](#).
2. Enter your email address.
3. Follow the on-screen steps (verification code, recovery email, or phone).
4. Set a new password.

Outlook/Hotmail

1. Visit [Microsoft Account Recovery](#).
2. Enter your email address.
3. Verify your identity (via SMS/email).
4. Create a new password.

4. Resetting Password for Online Accounts

1. Go to the website's **Login page**.
2. Click **Forgot Password**.
3. Enter your registered email/username.
4. Check your email for a reset link.

5. Follow the link and set a new password.

5. Password Best Practices

- Use at least **8–12 characters**.
- Include **uppercase, lowercase, numbers, and symbols**.
- Avoid personal info (birthdays, names).
- Change passwords regularly.
- Use a password manager for convenience.

6. Troubleshooting

- If reset link doesn't arrive → Check **Spam/Junk folder**.
- If locked out → Contact the service's **Helpdesk**.
- For workplace accounts → Call IT support at [Number](#).
